

SERVICE AND TECHNICAL ASSISTANCE

Cooling towers

INSPECTIONS

Inspection, prior to issue the corresponding **report** recording

- **State** of every element.
- **Proposal** for repair or replace any necessary element.

REVAMPING

Our technologists design **modifications and improvements in existing cooling towers** to customize them to new working conditions; always searching for the **best performance and energetic efficiency**

Cleaning and Disinfection

Cleaning and disinfection of cooling towers with bio dispersants and biocides (oxidizing and non-oxidizing), both at standstill and in continuous.

Annual Maintenance Service

We guarantee the correct state of each cooling tower element so that it be able to work according to the design performance, reducing the risk of a shutdown.
